

Author: Lucy Roberts

Assignment: Lab01

TASK 01

```
import numpy as np
```

```
a = 3
```

```
b = 2
```

```
c = np.array([a, b])
```

```
print(c)
```

Task 02

```
![Siena, Italy](Siena.jpg)
```

This is a picture of *Siena, Italy*. I would ****really**** like to go to Siena some day, perhaps as a study abroad opportunity.
